▼ MODULE 1: WHAT IS ARTIFICIAL INTELLIGENCE?

≡ About this module

≡ What is AI?

≡ What is the difference between AI and augmented intelligence?

≡ What does AI do?

≡ What predictions can AI make?

≡ How is AI evolving?

invisible role in everyday life, powering search recommendations, and speech recognition systems.

Artificial intelligence (AI) refers to the ability of a machine to learn patterns and make predictions. AI does not replace human decisions; instead, AI adds value to human judgment.

In its simplest form, artificial intelligence is a field that combines computer science and robust datasets to enable problem-solving.

Reflection: What do you think?

Take a moment to think about your answer to this question: How would you describe what AI does? Try to distill your
