▼ MODULE 1: WHAT IS ARTIFICIAL INTELLIGENCE?

≡ About this module

≡ What is AI?

≡ What is the difference between AI and augmented intelligence?

≡ What does AI do?

≡ What predictions can AI make?

≡ How is AI evolving?

predict which stores to give on topics ranging from shipping or business hours to merchandise and sizes.

Vision recognition

AI helps doctors identify serious diseases based on unusual symptoms and early-warning signs, and it reads speed limit and stop signs as it guides cars through traffic.

Fraud detection

AI analyzes patterns created when thousands of bank customers make credit card purchases, then predicts which charges might be the result of identity theft.
